

VISIONS & VALUES ADDENDUM

OUR UNDERSTANDING OF SUSTAINABILITY

It is very important to us to make our contribution to climate neutrality and resource conservation as well as create added value for our stakeholders and society as a whole.

As an innovative business, sustainability is central to our activities and future. It has always been a core value of Mechlif, combining economic, ecological, and social responsibility.

Through our vehicles and lifting systems, we support the waste management industry and help drive the transition to a circular economy, contributing to climate protection and resource conservation.

We view sustainability as an opportunity to create lasting value for our stakeholders and society through responsible actions and transparent communication.

OUR PRINCIPLES FOR SUSTAINABLE DEVELOPMENT

1. We take a holistic approach across the entire value chain, working closely with suppliers and customers to continuously advance ESG goals and drive responsible business practices.
2. We are committed to environmental protection by conserving natural resources and actively reducing CO₂ emissions in our operations and products.
3. We promote a strong culture of compliance by equipping employees and partners with training, clear guidelines, and the necessary resources to ensure standards are consistently met.
4. Our employees are central to our long-term success, so we foster a fair, inclusive, and forward-looking work environment that supports development, engagement, and retention.
5. We strive to maintain market leadership through continuous innovation, with a strong emphasis on sustainable solutions within the municipal vehicle industry.
